Germany**

Langenbach, 30 March 2022  Daniel Frentzen

verico SCE, Hagenaustrasse 7, 85416 Langenbach

Greenhouse gas emissions that cannot be avoided and are confirmed in the external audit can be broken down to individual products and offset through compensation (climate protection projects). The compensation of the calculated emissions is subject to external verification. The retirement of the emission certificates is verified in the process. These certificates are verified emission reductions from climate protection projects that follow high, globally recognised standards.
