HOPPE door handles

At HOPPE, consideration for the environment is of “constitutional” importance

Everyone bears responsibility for a healthy environment, but an industrial company, with its employees and many links in society, should be aware of its increased responsibility.

Our stance on the environment is based on the recognition that the conflicting aims of economy and ecology don't actually exist. No system is more sparing and efficient than nature herself. It's her processes which teach us efficiency and thrift:

Economy = Ecology

Based on economic-ecological demands, HOPPE seeks to achieve its goals as economically as possible using the means available as efficiently as possible, in other words, with due consideration for its resources. This is why we aim to

- increase the level of effectiveness by taking due care of the resources available
- avoid producing unwanted waste as much as possible.

At HOPPE, consideration for the environment is of “constitutional” importance

Some examples are:

- the manufacture of hardware in an environmentally-considerate way
- the recycling of waste-water and the use of a circulatory system for water required in manufacture
- bio-degradable packaging
- the use of recyclable scrap in the internal raw material cycle
- the use of process heat
- the generation of alternative energy
- energy efficiency measures

Certificates

All production facilities of the HOPPE Group in Germany, Italy and the Czech Republic are certified to DIN EN ISO 14001:2015 (Environmental Management System). Since 2014, HOPPE AG, Stadtallendorf, is certified to DIN EN ISO 50001:2018 (Energy Management System).

HOPPE quality labeling	
	10-year guarantee on the mechanical operation
	Made in Europe
	DIN EN ISO 14001 Environmentally-considerate manufacturing

We achieved the highest rating by  Byggvarubedömningen (the Swedish building materials assessment scheme). Assessment is based on the products' constituent materials and life cycle criteria. Aluminium handles made by HOPPE are recommended for environmentally sustainable construction.

You can find more environmental information about our products at Byggvarubedömningen. For product information, please contact HOPPE or your dealer.

Byggvarubedömningen (BVB) is a non-profit organisation that assesses and then provides information about sustainability-assessed goods and also promotes product development towards a toxin-free and structurally-sound environment.
