

HOPPE aluminium handles –
Four series in five colours

For all HOPPE door and window handles ...

HOPPE aluminium handles – Four series in five colours

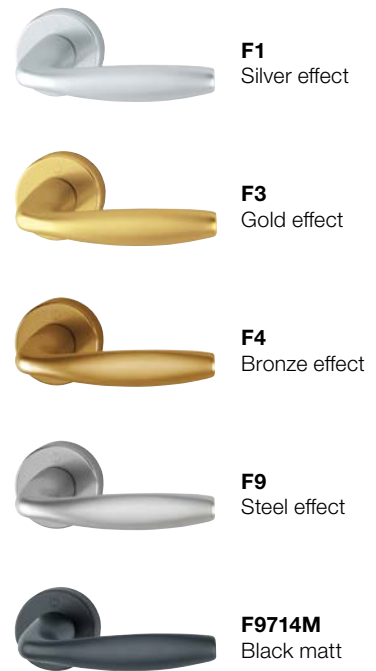

Handles from HOPPE can create new highlights for individual interior design styles. The aluminium series Hamburg, New York, Stockholm and Vitória are the ideal match for modern home furnishings.

The choice of five attractive finishes in each series makes it easy to find the right handle for every style. The familiar F1 silver effect and F9 steel effect are completed with the on-trend colours F3 gold effect, F4 bronze effect and F9714M matt black.

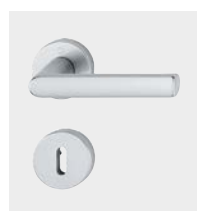

Black door handles are currently on trend. They are particularly impressive on dark-coloured door leaves, enhancing their modern impression in a stylish yet inconspicuous manner. These dark colour shades can lend a tone-in-tone furnishing style even more elegance.

Gold-coloured door handles perfectly match the on-trend metallic finishes of furniture and home accessories. They can also make a room feel cosy.

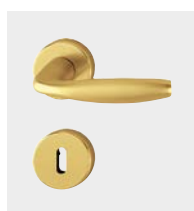

Our architectural fittings are extensively tested for lasting, flawless function – based on practice on the product carrier. That's why we offer a 10-year guarantee on the mechanical function of our door handles.

	HOPPE divides its product range into three lines based on the customers' different requirements in price and perception of value – duravert®, duraplus® and duranorm®. The purpose behind this is to enable you, our partners, to get a better overview of our product range and to make it easier for you to find the right handle of excellence.

We have achieved the highest rating by  Byggvarubedömningen (the Swedish building materials assessment scheme). Assessment is based on the products' constituent materials and life cycle criteria. Aluminium handles made by HOPPE are recommended for environmentally sustainable construction. You can find more environmental information about our products at

Byggvarubedömningen. For product information, please contact HOPPE or your dealer.

Byggvarubedömningen (BVB) is a non-profit organisation that assesses and then provides information about sustainability-assessed goods and also promotes product development towards a toxin-free and structurally-sound environment.
