NATURUM CLT FINISH **"A compliment to wood"**

Let us introduce you to **CLT Finish**, part of the **NATURUM** family—a brand dedicated to coat and protect. Specifically designed for CLT and glulam. **CLT Finish** is not just a varnish, it is a complete system designed to enhance the beauty of wood, using raw materials sourced from... **WOOD!**

Wood in the hood!

Wooden buildings are trending—and for a good reason. When grown responsibly, wood becomes an incredible carbon sink, helping us build sustainably.

Our aim is to preserve the original charm of the wood and give it a silky, durable finish that will help conserve the house for generations to come.

FÄRBYGGE

OUR TAKE ON MICROPLASTIC!

If we can reduce it, we will, and if we can avoid it, that's even better!

The binder utilized in CLT finish tests contains up to **100% bio-based content!**

We can't ignore that we're part of an industry with big challenges. **But instead of being caught up by the problem, let's focus on being part of the solution.**

By choosing alternative materials, we can shrink our carbon footprint. Replacing fossil resources with renewable ones. A smart way to go, at least in our honest view!

Values

Beyond just being a paint manufacturer, we see our role as a connector, happy to work across borders on the basis that what matters is where the greatest value is created.

Driving change requires a positive mindset, starting locally with a willingness to work together, why we're asking how we can help make your neighborhood even greater?

WHY IT MATTERS:

- **Protects & Preserves**
keeps wood looking fresh and natural.
- **Low Maintenance**
easy to clean and care for.
- **Enhances Natural Beauty of wood**
maintains brightness and slows discoloration.
- **VOC (<0.1% -to none)**
low VOC content is better for the environment and indoor air quality.
- **Made with up to 100% fossil-free binder**
(verified by the C14 ASTM D6866-22 Method B).
- **A low carbon footprint**
(validated through Life Cycle Analysis LCA/EPD).
- **Tested and proven**
by TVOC test qualifies for: French A+, French CMR components, Italian CAM Edilizia, ABG/AgBB, Belgian Regulation, EMICODE, Indoor Air Comfort GOLD, BREEAM International, LEED v4...

Backed by
European Social Fund
(Almi Green Finance),
based on our commitment to
reduce pollution.

BE PART OF THE CHANGE

We are proud to say that **CLT Finish** is made with up to **100% bio-based binder, without compromising on function or quality.**

Our commitment to sustainability isn't new. **Färgbygge** has been a Scandinavian green pioneer since 1979, and we're here to share our solutions with you.
